

hi
i'm adithya
web developer

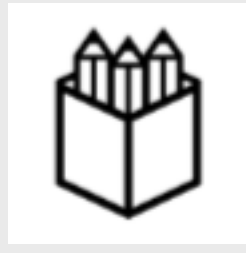

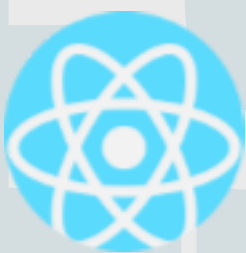

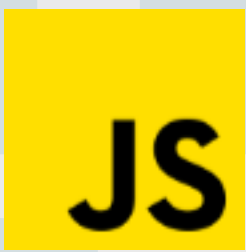

ABOUT ME

My journey into the world of web development began with a curiosity for how websites work and a drive to create engaging digital experiences. Through self-study and formal education, I have built a solid foundation in HTML, CSS, JavaScript, and the MERN stack (MongoDB, Express.js, React, Node.js). My love for coding is matched only by my love for coffee—lots and lots of coffee.

I've dedicated my time to learning and mastering the intricacies of web development, focusing on creating dynamic and responsive web applications. I'm currently on the lookout for freelance opportunities where I can bring your ideas to life (and maybe make a few bad jokes along the way).
